03 Investment Thesis

POCL is well-positioned as a leading recycler in India, benefitting from a diversified recycling portfolio (Lead, Copper, Plastics, Aluminium) and a robust global procurement network spanning over 70 countries. The successful commissioning of 36,000 MTPA Lead capacity under Phase 1 in April 2025 expands its finished goods capabilities to meet growing domestic and international demand. Financial stability is highlighted by a healthy net cash position, reduced net debt to equity of 0.11x in FY25, and a strong interest coverage ratio of 8.28x. Furthermore, regulatory tailwinds such as the Extended Producer Responsibility (EPR) guidelines and Battery Waste Management Rules (BWMR) support formal sector recyclers like POCL by boosting domestic scrap availability.

04 Risk Factors

The company's operations are subject to risks including fiscal policy changes, intense competition, inflationary pressures, and general economic conditions that impact demand, supply, and price conditions in domestic and international markets.
